

Hello, I am an Indiana resident on the do not call list. I am asking that Federal Law not preempt our Indiana law for several reasons. First, the list has made a difference in daily lives. The people who call during dinner, on weekends, have no respect for others or their lives, and no amount of persuasion could get me to join a group or any other activity on the telephone. This list just makes it easier for people like me who would not be participating anyway. I hope you can understand that this is a privacy right our state has enacted to protect us and improve our standard of living, not contrary to the Constitution in any way, and the will of the states as proscribed in the 10th Amendment. Thank you.
